

Jennifer Reyes, BSN, RN

Geriatric Care Manager

Jennifer has been a Registered Nurse for 10 years and is a graduate of Brenau University's School of Nursing where she received her Bachelor of Science in Nursing.

Jennifer began her career as a Medical-Surgical Nurse where she developed her nursing skills and hands on experience. This experience as a Med-Surg Nurse laid a strong foundation for her to work as an Intensive Care Nurse. During her time working in the ICU, she became Trauma Certified and worked with critically ill trauma patients. This time in the ICU developed an unwavering passion and desire to advocate for her patients throughout their hospital stay and beyond. Jennifer worked closely with the hospital social work team communicating what her patient's needs would be upon discharge home.

With her experience as a registered nurse, Jennifer views her work as a focused mission to serve others, especially older adults. Her personal and professional confidence is contagious as she partners with families and clients to tackle complex medical and care issues. She is passionate about empowering older adults as they navigate the continuum of care that exists as part of the aging journey.

Jennifer calls Georgia home as this is where she has spent most of her life and where she and her husband of 25 years raised their three beautiful girls. She enjoys time with family and their Bullmastiff dog named Hank that is attached to her hip. Jennifer enjoys hiking the great state of Georgia, Olympic weightlifting, and spoiling her granddaughter rotten.
